Dear Gary,

I've checked the retyped ms. of what was published as Case Open.

This has been done through Chapter XXV and into XXVI.

There are thus six more chpaters to be retyped plus an Epilogue.

As I said yesterday, you/your group/is/are welcome to use or copy it but I cannot do the copying. The dividing I referred to is that there are two sets. It will be simple to separate them. That will take little time. I've kept them as I've gotten them because when I box them I want the last on the bottomm of the box.

If I did not tell you, as the book developed and I was addressing what Posner said proved Oswald's guilt what emerged is a powerful exculpation of Oswald and that from the official evidence only!

Do not misunderstand this. That was not my intention. It just worked out that way as in a court it also would have.

Best,

Harold
